

HOW TO DISPOSE OF GREASE

GREASE IS HARMFUL TO PIPES AND THE SEWER SYSTEM AS IT CAN CAUSE MAJOR BLOCKAGES.

01

Let the oil or grease solidify, scrape grease into a container, place container in a plastic bag, and dispose in the trash can.

02

Use paper towels to clean up any excess grease left where it cooled. Dispose of towels in trash can.

03

To store grease for reuse, place in an air tight container.

04

Grease can be recycled by some local collection sites. Use a recycling locator to find a site near you.
